II. Read the following passage and choose the best option to answer. Write your answers in the corresponding numbered boxes. (2.0 points)

Today we take electricity for granted and perhaps we do not realize just how useful this discovery has been. Steam was the first invention that replaced wind power. It was used to drive engines and was passed through pipes and radiators to warm rooms. Petrol mixed with air was the next invention that provided power. Exploded in a cylinder, it drove a motor engine. Beyond these simple and direct uses, those forms have not much adaptability.

On the other hand, we make use of electricity in thousands of ways. From the powerful voltages that drive our electric trains to the tiny current needed to work a simple calculator, and from the huge electric magnet in steel works that can lift 10 tons to the tiny electric magnet in a doorbell, all are powered by electricity. An electric current can be made with equal ease to heat a huge mass of molten metal in a furnace, or to boil a jug for a cup of coffee.

Other than atomic energy, which has not as yet been harnessed to the full, electricity is the greatest power in the world. It is flexible, and so adaptable for any task for which it is wanted. It travels so easily and with incredible speed along wires and conductors that it can be supplied instantly over vast distances.

To **generate** electricity, huge turbines or generators must be turned. In Australia they use coal or water to drive this machinery. When dams are built, falling water is used to drive the turbines without polluting the atmosphere with smoke from coal.

Atomic power is used in several countries but there is always the fear of an accident. A tragedy once occurred at Chernobyl, in Ukraine, at an atomic power plant used to make electricity. The reactor leaked, which caused many deaths through radiation.

Now scientists are examining new ways of creating electricity without harmful effects to the environment. They may harness the tides as **they** flow in and out of bays. Most importantly, they hope to trap sunlight more efficiently. We do not use solar heaters for swimming pools but as yet improvement in the capacity of the solar cells to create more current is necessary. When this happens, electric cars will be viable and the world will rid itself of the toxic gases given off by trucks and cars that burn fossil fuels.

1. What could be the best title for this passage?
 - A. Types of Power Plants
 - B. Electricity: Harmful Effects on Our Life
 - C. How to Produce Electricity
 - D. Why Electricity is So Remarkable
2. The author mentions the sources of energy such as wind, steam, petrol in the first paragraph to _____.
 - A. suggest that electricity should be alternated with safer sources of energy
 - B. emphasize the usefulness and adaptability of electricity
 - C. imply that electricity is not the only useful source of energy
 - D. discuss which source of energy can be a suitable alternative to electricity
3. The word “**generate**” in the passage is **CLOSEST** in meaning to _____.
 - A. invent
 - B. use
 - C. create
 - D. discover
4. What does the author mean by saying that electricity is flexible?
 - A. It is cheap and easy to use
 - B. It is used to drive motor engines
 - C. It can be adapted to various uses
 - D. It can be made with ease
5. What do we call machines that make electricity?
 - A. Voltages
 - B. Electric magnets
 - C. Generators or Turbines
 - D. Pipes and radiators
6. The main forms of power used to generate electricity in Australia are _____.
 - A. atomic power and water
 - B. water and coal
 - C. sunlight and wind power
 - D. wind and gas
7. The word “**they**” in the last paragraph refers to _____.
 - A. harmful effects
 - B. the tides
 - C. scientists
 - D. new ways
8. According to the passage, electric magnets are used in steel works to _____.
 - A. lift heavy weights up to ten tons
 - B. test the steel for strength
 - C. heat the molten steel
 - D. boil a jug of water
9. The advantage of harnessing the power of the tides and of sunlight to generate electricity is that they _____.
 - A. do not pollute the environment
 - B. are more reliable
 - C. are more adaptable
 - D. do not require attention
10. According to the passage, the following power sources cause no pollution to the environment **EXCEPT** _____.
 - A. Sunlight
 - B. Petrol
 - C. Water
 - D. Wind

6.	7.	8.	9.	10.

III. Read the following passage and do the tasks that follow. Write your answers in the corresponding numbered boxes. (2.0 points)

A

Instead of buying costly prepared meals, which often tend to be high in calories, cook your own at home. Plan out your meals with high-fiber foods like beans and whole grains which will keep you full and are a cheaper, healthier alternative to rich proteins and more processed grains.

B

Eating less leads to weight loss, and cost savings, especially if you cut down on the right things. Start by cutting your portions of pricy meat and poultry. Or swap out meat and poultry for cheaper vegetarian proteins like beans, lentils, tofu, and eggs for some of your meals.

C

Vegetables are great for weight loss, as well as all-around health. They are low in calories and high in water and fiber - two things that keep you feeling full. Save cash by shopping for those that are in season. Frozen vegetables can be a great bargain, with just as much nutrition as fresh, since they are picked and frozen at their peak ripeness.

D

You don't need to shell out a monthly gym fee to get moving. Instead, find fun activities you enjoy for free. If you're just getting started with a regular exercise routine, try your beginning with daily walks: start slowly and build up time and speed.

E

One of the most powerful resources you have for helping you lose weight is your social network. Find a friend who is also trying to lose weight and agree to help each other stay motivated. One study found that when friends participated in a group weight-loss program together, they lost more weight than people who did the same program on their own.

Questions 1-5: The paragraphs of reading passage are lettered A-E. Choose the most suitable heading for each paragraph from the list of headings below.
